Grade 6 Spotlight

Share and Connect – Grade 6 Exhibition

As some of you may be aware, Kingsville teach with the Primary Years Program (PYP). Towards the end of a student’s time at Kingsville Primary they are given an opportunity to showcase how the PYP has influenced the way they inquire, investigate and present their work.

The Grade 6 students have been busy putting together their Exhibition. This year’s theme is ‘How We Organise Ourselves’. Students choose a subject matter such as ‘our prison system’, ‘politics’ etc and explored that subject identifying, investigating and offering solutions to real life issues or problems.

Why an exhibition?

- It allows students to engage in an in-depth, collaborative enquiry.
- Provides students the opportunity to demonstrate independence and responsibility for their learning.
- It gives students the chance to explore multiple perspectives.
- Gives students the chance to showcase their PYP learnings.
- Is an excellent opportunity to unite students, teachers, parents and other members of the school community.

It really is a wonderful exhibition and we would strongly recommend that KPS parents, with students of all ages, come visit and see how KPS students become inquisitive, engaged and inspiring members of our community.
This t-shirt is part of that process. It’s been designed, manufactured and marketed by the inmates with enthusiasm and pride.
HOW DOES CORRUPTION AFFECT A SOCIETY?

Corruption starts with a person: if this person is in a position of power they can use the money and resources to benefit them, taking money away from what is most important and civil society falls into disrepair, people living in poverty and the corrupt leader could be living in complete luxury with more stuff than they need. If the circumstances are in the lesser corrupt countries, the leader could be damaging the people's trust in them for corruption in peace and security means that the country is not as safe as it could be because the police could be corrupting others from corruption.

ALL BAD ANY GOOD?

Corruption is never good, whether it is in political office, finance or not, because it affects the whole world the whole world can feel it together. Transparency International is an organisation that try to minimise the amount of corruption in the world. Every year Transparency International do a new index called the corruption perceptions index. The index is a way that shows the corruption every country is and that may change every year. It is used to help countries realise how corrupt they are.
I respect other people's ideas. If in exhibition I take...
